

## Starling – £100m Grant

Financial technology can, and should, make SME banking quicker, smoother, fairer and more transparent. It should put entrepreneurs in control, give them an overview of their finances, help them track their transactions and seamlessly connect them with new sources of capital, services and software. It should also have customer support on hand 24/7, at precisely the moments they need it.

The £100m “Capability and Innovation Fund” (CIF) grant will enable Starling to radically transform business banking for customers in the UK, disrupting the stronghold of Big Four banks, whilst delivering a solution that helps financial innovators to coexist in a connected and collaborative banking ecosystem.

To demonstrate its commitment, Starling will also invest a further £95m of its own funds in support of this initiative, over four years.

Starling has designed its initiative to positively challenge the dominance of the big banks and to make customers want to change who they bank with. By investing in proprietary, cloud-based technology, and extending its established banking and engineering capabilities, Starling will rapidly accelerate the development of its market-disrupting business bank.

Starling will achieve this by delivering the following:

Sophisticated banking solutions that will simplify complex business life: Starling will build a full suite of 52 digital banking products to meet the needs of all sole traders, micro businesses and small SME businesses. Examples include flexible deposit accounts, multiuser card functionality, instant invoicing, VAT management, advanced invoice financing, smart FX, supply chain finance using blockchain based technology and secured business lending.

Digital touchpoints that are beautifully designed and secure to use: SME customers will be able to move effortlessly between digital channels to originate, authorise and manage transactions on the go and team banking for multi-user accounts. Starling understands that many SMEs want to manage their banking online as well as through mobile applications and to support this, it will launch its web portal in Q3 2019.

Digitally-enabled customer services and relationship management: SME customers will receive instant advice 24/7 including virtual assistance, relationship manager (RM) matching and micro scheduling to book “to the minute” appointments.

Intelligent tools that utilise data to offer insight and automation: Starling will launch ‘My Financials’, an AI-based predictive tool showing cash-flow forecasting and, where appropriate and with consent, recommendations for banking solutions.

Marketplace for business: the Starling Marketplace, which allows SME owners to access a wide range of third-party financial services and software providers to personalise their account, will include no fewer than 48 new partners, mostly UK based, including treasury services and human resources. Marketplace will also provide personalised recommendations for third-party applications, based on analysis of business and wider industry and seasonal trends.

Starling will also build a suite of lending products using automated and secure processes that deliver loans in minutes to boost SME growth and productivity. Starling commits to having made £913m of additional lending available to SMEs by the end of 2023.

Starling has set a goal of attracting over 450,000 customers by the end of 2023. This will allow Starling to have the market size to make an enduring change to competition. Starling will achieve this while at the same time maintaining existing high levels of customer satisfaction. Starling will continue to monitor and maintain a high current app store rating.

A bank for all regions: Starling is committed to serving SMEs throughout the UK. Currently 68% of its SME customer base is outside Greater London. Starling will continue with this UK wide focus with over 60% of all future business customers based outside of London. Starling will also locate its new Operations Centre outside of London.

Starling will continue providing counter access for SMEs that need to make cash deposits and withdrawals through its partnership with the Post Office, which has 11,500 branches, more than all the UK's banks and building societies combined.

An inclusive workforce: Starling commits to recruiting an additional 398 staff within the UK. Starling will be an active member of the Tech She Can Charter, working across the industry to increase the number of women working in technology roles in the UK. It is already a signatory of the Women in Finance Charter and has pledged to have 40% of its senior positions occupied by women by 2021. It will embrace inclusion in all its forms.

Backing UK technology: Starling will continue to design, deliver and maintain its leading edge technology platform in the UK. Included in the 398 staff recruited will be 84 engineers, again based in the UK. Where possible, it will purchase from UK-based SME financial services and software companies when it requires expertise outside its own core competencies.

Technology for good: Starling commits to maintaining best-in-class processes to protect client and personal data, as well as commercially sensitive data of its commercial partners and to reporting incidents as required by GDPR. It commits to a regular independent audit of its algorithms and technological processes to ensure they are fair and free from bias and prejudice.

Stimulating market innovation: Starling will provide SME customers with a comprehensive set of open APIs allowing customers to tailor the platform to their individual needs. Starling's advances and innovation will also force other banks to respond, delivering a better service for sole traders, micro businesses and small SMEs in the UK. This will rapidly improve outcomes for the people that make up 59% of UK employment and businesses that make up 99% of the UK economy.
